

Aerosol Cans Disposal Procedures

Effective immediately, waste generators can collect all unwanted, aerosol cans into the same collection container for disposal. Waste generators will no longer have to characterize aerosol cans.

Just place them into a collection container and Label it “**Aerosol Cans**”

The waste generator is still required to complete a “Chemical Waste Pickup Request Form” and send it to the Hazard Control Technology Team (HCTT) to arrange a pickup. And, that’s it!

The following are procedures for disposal of aerosol cans:

- ✚ Place all aerosol cans into a sturdy collection container, i.e. poly pail, Plastic Bin, poly bag
- ✚ Label the container “**Aerosol Cans**”.
- ✚ Complete a “**Chemical Waste Pickup Request Form #10**”.
- ✚ Send the completed waste form to HCTT at MS 363 to schedule a pickup.
